

Evidence of Progress Monitoring

School District of Indian River County

#SDIRCStrongerTogether

Date: 9/30/2020

School/Department: Indian River Charter High School

Action Step

and Description:

(If more than one action step is evidenced here, please include all action step #'s and a brief description of each.)

1.15 High school instructional staff and administrators will identify the specific standards from Unit Assessments in English, Mathematics, Biology, and U.S. History by race to support schools in identifying course concepts / standards that need to be retaught to improve mastery for African American students and reduce the likelihood of course failures.

Explanation of Evidence:

At the beginning of the school year, administration will provide teachers with baseline data on student performance on assessments. This performance data will be pulled from the school's information system, FOCUS. Teachers can use this data to identify African American students who are low-performing and begin strategizing how to meet those students' instructional needs. They can use the breakdown of how African American students performed on specific concepts to target standards. Some monthly department meetings will focus on data and teachers will share best practices on using formative assessments to determine which concepts should be retaught for African American students on their rosters. An example of baseline data for African American students that was shared with the English Language Arts and Mathematics Departments has been uploaded (A.A. Baseline FSA ELA Breakdown and A.A. Baseline FSA Algebra I Breakdown). Teachers will also utilize formative data gathered through iReady. Training on the iReady platform has been completed and the first round of formative assessments utilizing this platform is scheduled for 10/07/20 (iReady Training Email, iReady Sessions 10-07-20).

Results of Action Taken:

Some data chats have already taken place and will be a regular occurrence throughout the year. Classroom observations and walkthroughs will help administration ensure that data is driving instruction.

Reflection:

Currently, the school does not have access to all of the data harvesting software that the school district utilizes. Free and open access to this software could help the school collect more expansive data on performance.

New Teacher Meeting, 11:45am

Gregory Zajicek

to employees@irchs.org ▾

8:15 AM (1 hour ago)

Good Morning Everyone,

As a reminder, today's faculty meeting will focus on our upcoming iReady diagnostic. Melanie Gray from iReady will join us on our Google Meet Link that Jeremy had previously sent out for today. If you do not want to search for the email, I have reattached the link here:

<https://meet.google.com/naq-yxow-trc>

After our meeting with Melanie, I will send out information to assist everyone in the administration of iReady.

Thank you in advance for your help with iReady. Please let me know if you have any questions after the meeting and I will be happy to assist.

Sincerely,

Greg
