**Evidence of Progress
Monitoring
(Please include
narrative/description
of the action taken.
Where applicable,
please include all
measurable data.)**

The documentation attached is a review of enrollment in advanced courses. The documentation compares the percent of the population as well as the percent in advanced classes. Administration and guidance counselors have reviewed the information. While the documentation and review shows a need to continue to increase opportunities for Black or African American students in advanced courses it also shows a significant increase from October. There was an overall increase in students taking advanced course work of 5.7%. Our Black or African American percentage increased by .34 Hispanic by 1.9 and the percentage of white students in advanced coursework dropped by 3.5%. We attribute this to bringing back 140 students this month.

**Results of Action
Taken:**

Additional supports will be put in place for those Black or African American students who are struggling. These will include afterschool and home base tutoring opportunities and mentors. After school tutoring has begun and mentors have begun to be assigned

Reflection:

Our overall percent of the student population for Black or African American students is 11.4% while the percent of Black or African American students taking advanced classes is only 6.14%. This is an area that needs to be continually monitored to provide opportunities as well as support for our Black or African American students to be successful in advanced courses.
