School/Department: Treasure Coast Elementary

Action Step # and Description: 1.38 School Level Data Chat Regression Review
(If more than one action step is evidenced here, please include all action step #'s and a brief description of each.)

Explanation of Evidence: Two data spreadsheets are attached. The top spreadsheet represents current 5th grade, African-American students ELA scores. It includes 3rd Grade FSA scores, 4th grade winter iReady, 5th grade fall iReady (current), and District Assessment Unit 1 (current). The second spreadsheet is the same information, but for Math. The second page includes charts that shows the correlation between Unit Assessment scores and FSA.

Results of Action Taken: In ELA, we have four 5th Grade students who earned a 3, 4 or 5 on the last FSA. In Math, we have six 5th grade students who earned a 3, 4, or 5 on the last FSA. Students with regression have been emphasized by teacher for additional small group instruction.

Reflection: Upon reflection, we do feel that it is too early to make predictions with only two data points. However, we will continue to monitor the students and support them in the classroom to see if the trend continues.
