

African American Achievement Plan 2023-2024 Assurances of Implementation of Strategies/Action Steps

Quarter of the School Year: 2

School: Sebastian River Middle School

In October 2023, the School District of Indian River County initiated the implementation of the 2023-2024 African American Achievement Plan. To review and ensure compliance with progress of action steps associated with the African American Achievement Plan, the District provides quarterly updates related to action steps accomplished and quarterly outcomes.

The attached documentation provides school level evidence of progress towards accomplishing action steps incorporated into the 2023-2024 African American Achievement Plan. Documentation requirements have been designed to honor the full intent of the developed African American Achievement Plan while optimizing the efficiency and effectiveness of outlined actionable steps.

To support ongoing accountability of action step implementation, documentation, and progress the following assurances have been verified by the principal/supervisor of each school/location:

- Action steps included within the 2023-2024 African American Achievement Plan have been implemented with consistency and purpose to eliminate the achievement gap.
- Progress related to action steps has been monitored at designated intervals (e.g., monthly, quarterly) outlined in the African American Achievement Plan.
- Data reviews have been conducted to identify areas of strength and concern and disaggregated data will be provided upon request.
- Progress related to the elimination of the achievement gap has been monitored in an ongoing way and needed modifications have been made as identified.

These assurances have been reviewed and verified on December 20, 2023: (NG)

Quarterly Reflection

(Please summarize any reflections based upon action step implementation for the quarter. What are areas of progress or opportunities for growth? What are next steps based upon work accomplished?)

The implementation of our action steps reveal progress in the areas of teaching African American History which is evident in an increase average daily attendance among African American students. There are still opportunities for growth in the areas of targeted interventions and intentional planning for formative assessments and monitoring.

Diagnostic Follow Up

For Teachers

Tips & Tools for Engaging Middle School Students in Data Chats

Make Data Chats Fun

Make data chats special, extraordinary, and fun by offsetting what you usually do in class. Allow students to sit where they choose, give permission to eat snacks, or have a themed party for your data chats days. **Choose props** and take pictures, too!

Engage in Friendly Competition

Have friendly competitions between your classes or with another teacher to support students in their goals and action steps. This will help students realize that the goals they set with you during data chats affect class goals, too.

Have Whole Class or Small Group Data Chats

Instead of meeting with each student individually before, after, and in between Diagnostics, turn some of those meetings into 15-minute whole class or small group data chats. Provide Data Chat Worksheets to each student, and give access to the data you want students to review. Then use sample data when discussing with the class, and have students reflect on their own data using questions and prompts of your choice.

Dedicate Time Each Week to Meet with a Few Students

Dedicate 15 minutes each week for personalized data chats. Have a sign-up sheet for students seeking more support, and reserve a few spots for students you note who may benefit from more individualized support.

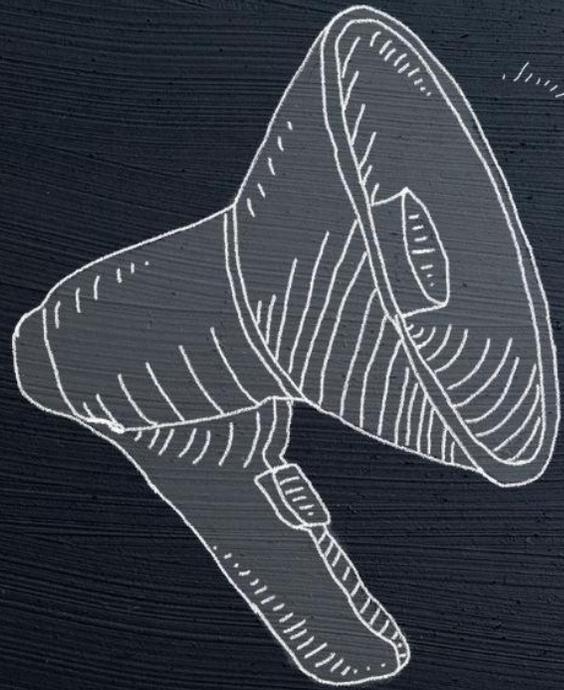

Have Students Lead Data Chats

When you engage with students during a data chat, let them start the conversation. This will empower them to take even more ownership over their learning, knowing that they are the ones sharing their own data with you. If they have trouble starting the conversation, start with a question like, "What do you notice?" to get them talking.

Help students lead the data chats by:

- Empowering them to dig into their own data and talking to them about it in a clear and honest way
