Action Step #

and Description: Action Step 1.6 - Extended Learning Opportunities for Remediation and Enrichment
(If more than one action step is evidenced here, please include all action step #'s and a brief description of each.)

Explanation of Evidence:

In order to extend learning opportunities for remediation and enrichment, Oslo is offering before school, during school, and after school options to students in need of intervention or enrichment. These include before school tutoring for ESE students during Oslo's "home base" period before the instructional day begins, targeted data-driven support in classrooms through differentiation and TA support, virtual tutoring, and after school tutoring for math, reading, ELA, science, and civics provided by certified Oslo teachers as well as Feed the Lambs after school tutoring.

Results of Action Taken:

The expected outcomes of our extended learning opportunities for remediation and enrichment include increased performance in class, on daily assignments, Unit Assessments, and other formative assessments.

Reflection:

Increased focus on specific areas for academic improvement and targeted support for identified students contributes to a climate of success and growth at Oslo. While not all students will perform exactly the same, ALL students can continue to grow and be challenged academically. With this mindset embedded in the daily fabric of our school, students and teachers are driven to succeed.
