1.13 – Data Chats for Improved Student Learning

Provide support to teachers and administrators on the use of real-time data specific to African American students in order to have effective data chats and plan targeted support for improved learning.

**Explanation of Evidence:**

**Agenda:** This document details the items discussed and staff in attendance.  
**Selected Screenshots:** These screenshots are samples from the data reviewed during RTI Data Chats and Impact Reviews. They are not comprehensive, but only a sample.

**Results of Action Taken:**

As a result of the RTI Data Chats, intervention and enrichment groups have been formed and have either started already or will begin on October 12, 2020. Special attention was paid to AA students to ensure appropriate supports/enrichment opportunities were put in place.

As a result of the Impact Reviews, VBE recognized an area of improvement for our school. Due to the findings, we can target specific areas to improve differentiation for our students. Furthermore, it was brought to light that VBE can improve its visual representation of all demographic populations within our school.

**Reflection:**

At this time, we have just begun our RTI groups. We have begun to implement the feedback from our Impact Reviews. Since both data chats have been within the past two weeks, we do not currently have enough actionable feedback to provide a comprehensive reflection. We will continue to monitor the effectiveness of our

newly formed RTI groups as well as conduct walkthroughs to determine if Impact Review feedback is being acted upon.
