

Evidence of Progress Monitoring

School District of Indian River County #SDIRCStrongerTogether

Date: 10/21/20

School/Department: Strategic Planning & Support Services

Action Step # and Description:
(If more than one action

step is evidenced here, please include all action step #'s and a brief description of each.) Action Step: 1.25 School counselors will implement universal screening for gifted identification for all students prior to 4th grade across all District elementary schools utilizing procedures outlined in the state-approved District plan for increasing underrepresented populations in gifted. Evidence of Progress Monitoring: Universal Screening Implementation Results

Explanation of Evidence:

A list of all students with iReady scores at or above the 83rd %ile were sent out to all elementary principals, site based RS's and School Psychologists. Explicit directions for screening (universal screener) and enrichment supports were disseminated as well. See attached evidence.

Results of Action Taken:

Schools have begun the universal screening process.

Reflection:

I have been providing training to ESE staff who will then build capacity within their site based teams.

Dear BLANK Team,

Attached you will find a list of all students within your school setting that are not currently identified as gifted and have scored at or above the 83rd% on the MATH or ELA 20-21 FALL iReady diagnostics. This is an action step outlined in our AAAP and is our district's current implementation of universal gifted screening. The purpose of universal screening, as related to gifted eligibility and services, is to identify those students who MAY be candidates for referral for screening that may result in further evaluation for gifted eligibility, after consideration of other pieces of relevant data and observations.

It is important to recognize there is underrepresentation of certain subgroups in our programming for gifted services, including culturally and linguistically diverse students and students who have been identified as economically disadvantaged. Consistent with our procedures to identify potential candidates for gifted screening from underrepresented populations, lists of all students who have performed at exceptional levels related to standardized measures in ELA OR Math, have been generated as a support to schools related to identification processes.

Some important considerations teams should make when identifying which students on the list should move forward for additional screening are as follows, but not limited to:

- Previous screenings or formal evaluations (and results) for gifted;
- Teacher observations related to characteristics associated with gifted students;
- Overall measures of student academic performance;
- Tiered levels of support required for student academic progress;
- · Levels of acculturation and linguistic development; and
- The student's individual need for gifted programming.

Additionally, there are characteristics commonly associated with giftedness, such as stubbornness, refusal to complete rote assignments; calling teachers and peers out, perseveration, and frustration with failure, that are frequently overlooked.

It is not a requirement that those students who appear on the generated lists be screened for gifted. Please keep in mind that students not identified on the lists provided can be considered for gifted screening as well.

Your school has also been identified as having chronic underrepresentation in students found eligible for gifted services (5 or less students); **it is recommended that you implement formalized, district-supported Tier 2 Enrichment Services. This plan is in place to increase enrichment opportunities for students who would likely benefit from increased rigor and higher-level thinking skills. Attached you will find a document that outlines IR MTSS Tier 2 Enrichment Services. Your RS and School Psychologist have received thorough review of these services and can provide additional assistance and guidance to the site-based team.

All educational decisions related to screening and evaluation efforts should be based upon a comprehensive review of each student's academic strengths and needs.

Please feel free to contact me if you have any questions related to gifted screenings or the lists provided. 🕲

.....

Sincerely,

Jessica Rojas, Ed.S

School District of Indian River County District Plan to Increase the Participation of Underrepresented Students in the Program for Students Who Are Gifted

Targeted Populations in all District Schools:

Populations targeted through the School District of Indian River County's Plan B include English Language Learners (ELL) and students from families identified with low socioeconomic status.

- 1. ELL students are defined by the following classifications:
 - a. LY = K 12 grade ELL students enrolled in classes specifically designed for ELL students.
 - b. LP = K 12 grade ELL students for whom the reading/writing test is pending.
 - c. LF = K 12 grade former ELL students who exited the program within the last two years.
 - d. Students whose primary language spoken in the home is other than English (as indicated on their initial registration form) whose score on a test of English proficiency indicates a CALP level of fluent, but only within the first two years of being enrolled in a classroom where instruction is delivered primarily in English.

2. Low SES is defined as students who are eligible for the government-subsidized free or reduced lunch program.

Screening and Referral Procedures

To assist in ensuring that potentially gifted students are being systematically screened, during the fall of each academic year, the Program Specialist for Gifted Services for the School District of Indian River County will review student scores related the statewide assessment test (i.e., the Florida Standards Assessments) for all 4th – 6th grade students across the district obtaining scores on this test. Students scoring a level 4 or level 5 on the English Language Arts and/or Mathematics portions of this assessment will be identified for potential further screening. Student names identified through this review process will be sent to the administrators of the school in which they are enrolled, with administrators sending these names to their corresponding school-based team to consider whether they are potential candidates for further screening for gifted evaluation.

For students in grade K-3, who do not have scores related to statewide Florida Standards Assessments, the average of the previous year's iReady diagnostic tests will be computed. Students scoring at or above the 83^{rd} percentile will be identified for potential further screening. Student names identified through this review process will be sent to the administrators of the school in which they are enrolled, with administrators sending these names to their corresponding school-based team to consider whether they are potential candidates for further screening for gifted evaluation.

These review processes provide an additional method for identifying potential candidates for gifted programming, in addition to teacher or parent referral. The Program Specialist for Gifted Services and teachers of the gifted provide professional development and consultation regarding characteristics of gifted students, with special emphasis on those which are often demonstrated by members of the underrepresented groups with high potential.

Student Evaluation Procedures

- 1. The evaluator reviews existing educational and screening data related to student performance and abilities.
- 2. Based upon a review of existing data, the evaluator selects and administers a culturally-sensitive standardized measure of intellectual ability.

Eligibility Criteria

A student is eligible for special instructional programs for the gifted under Plan B from kindergarten through grade 12, if the student demonstrates:

- a) The need for a special program as indicated by one or more of the following statements checked in the referral paperwork.
 - a. Ability above regular class curricula
 - b. Interest far advanced for regular classwork
 - c. Social maturity above classmates
 - d. Needs stimulation of advanced program
- b) A majority of characteristics of gifted students according to a standard scale or checklist completed by at least one of the student's teachers. Please see forms included below.
- c) Above average intellectual development as measured by an intelligence quotient of 119 or above on an individually administered standardized test of intelligence.

Instructional Program Modifications or Adaptations

The School District of Indian River County is committed to developing excellence in all students regardless of race, gender, economic status, cultural background, language acquisition, or disability. The District recognizes that gifted students need a qualitatively different educational program that takes into account their unusual

intellectual abilities and provides them with a greater range of challenges than those offered by the regular school services. Students who are English Language Learners and students who come from families with low socioeconomic status have additional cognitive and social/emotional needs that must be addressed through the gifted program. This is addressed through differentiated curriculum and flexibility in pace and product complexity to ensure successful and continued participation of students from underrepresented groups. The District recognizes that students from these underrepresented groups have talents and perspectives that allow them to make valuable contributions within our gifted classrooms. The gifted education program focuses on the development of skills to enable all students to function successfully in a multi-cultural society. An increased awareness and acceptance of the differences that exist between individuals and cultures are emphasized.

District Evaluation Plan

1. Data regarding the number of under-represented students in the gifted program will be reviewed annually and will include, but not be limited to: district percentages, school percentages, and percentage of growth or decline. Specific areas in need of improvement, including adjustments to the District's Plan B guidelines, as well as the provision of additional professional development will be based upon this annual review.

School District of Indian River County Indian River Multi-Tiered System of Supports

Tier 2 Enrichment Support Services – Referral and Implementation Procedures

Procedures for the provision IR MTSS Tier 2 Enrichment Support Services have been developed to assist in meeting the academic needs of students who could benefit from supplemental enrichment supports through the IR MTSS framework. Elementary schools who may consider integrating these supports into their Multi-Tiered System of Supports framework are those in which a chronic underrepresentation in students found eligible for gifted services has been identified. The Tier 2 enrichment support services are designed with the intent to increase the probability that additional students are identified for gifted services within the school, with the school's responsibility for identifying students in need of gifted services remaining the same. The enrichment support services will be provided during the block of time that gifted services are provided at the assigned school and within time frames identified as appropriate by the school and will be provided by a gifted-endorsed teacher. This scheduling provides the additional benefit by providing students already in the gifted program and high achieving peers increased, accelerated cooperative learning opportunities and time for peer interaction.

- 1. Schools identified to receive formalized, district-supported Tier 2 Enrichment Services meet the following criteria:
 - a. During the two previous academic years, the total school gifted population (grades K-5) has been 10 or less students, and
 - b. During the first day of the current academic year, the total school gifted population is five (5) or less students (K-5)
- 2. Schools identified using these criteria through a district-level review process by the Program Specialist for Psychological and Gifted Services at the beginning of the academic year, will be notified via written notice that they may want to integrate these supports into their multi-tiered framework.
- 3. After the school receives their notification of the option of supporting IR MTSS Tier 2 Enrichment Services within their school setting, a committee review of student data for grades K-5 will be conducted to identify potential candidates for enrichment support services. This committee should, at a minimum, contain the following members: school-based administrator, ESE resource specialist, and school psychologist.
- 4. The review process should occur twice a year (once at the beginning of each school semester). The review process of student data should consider, but is not limited to, the following elements: previous FSA scores, district unit test scores, iReady scores, student grades, classroom assessment data, previous consideration for gifted eligibility, teacher report of need for enrichment services. Please see Worksheet for Enrichment Support Services for documentation of this review process.
- 5. Based upon this review process, students demonstrating the strongest overall need for enrichment support services should be identified. The number of available student seats for IR MTSS Tier 2 Enrichment Support Services will be determined based upon the existing population of students receiving gifted services and can be calculated using the following formula:

- 6. Following the committee identification of students for enrichment support services, the school-based ESE Resource Specialist will send the Parent Notice for IR MTSS Tier 2 Enrichment Support Services to the student's parents/guardians. This notice will explain the purposes, delivery method, and timeframes of the enrichment support services to be provided. This notice will clearly outline to parents that the enrichment support services are offered on a 9-week to semester basis. Notice for enrichment support services will be sent out at the beginning of each semester, as the identified students may change based upon committee review, upon identification of a student need to benefit from core instruction and supports in his/her general education classroom, and also to increase the availability of this opportunity to additional students who may benefit within the overall school population.
- 7. While students are receiving enrichment support services, the school reserves the right to make adjustments to the student's receipt of the support services based upon any academic concerns identified as related to the student's non-participation in core instruction as a result of participation in Tier 2 enrichment support services programming. If it is determined through committee review that it is in the best interest of a student's educational progress and development to discontinue these supports, this determination will be discussed with the student's parent/guardian to identify the best method of transition back into core instruction in the general education classroom during the enrichment support services block.
- 8. Students will not be expected to make up work that occurred in their general education classroom, while in attendance in the enrichment support services block. Any specific questions or concerns parents/guardians may have related to student performance during the enrichment support services block may be addressed by contacting the student's teacher for the enrichment support services block.
